Fordhook Bush Lima Beans

True Bush Form—Prolific—
Large Well-Filled Pods.

Thicker and rounder than the Wilson, this variety of the potato type is very popular, and, in our judgment, the best Large Bush Lima, either for home or market. Pkt. 10 cts., ½ lb. 20 cts., lb. 35 cts., 2 lbs. 65 cts., 5 lbs. \$1.50, 10 lbs. \$2.50. Postpaid. Not prepaid, 25 lbs. \$4.00, 50 lbs. \$7.50.

BEET

Early Wonder A splendid variety. The root is globular shaped, with small tap root, of a beautiful blood-red color and of splendid quality. Derservedly popular with both home and market gardeners. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts. Postpaid.

Crosby's Egyptian Beet Our stock of this popular early variety has been bred to perfection. The roots are of a most attractive flattened globe shape, with medium tap root, and the quality all that could be desired for either the market or home garden. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts. Postpaid.

Special Crosby's Egyptian A selection from our regular Crosby's Egyptian. It has the same shape, and all the fine qualities of that beet, but with bright red skin. Many growers prefer it to the darker variety. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 85 cts. Postpaid.

Detroit None of the globe-shaped beets for the main crop are as dark in color as this, and it is also remarkable for uniformity in size and shape. The skin is very smooth, the flesh crisp, tender, sweet, and extremely tenacious of its brilliant color. A splendid kind for home and market gardeners. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts. Postpaid.

Eclipse Once largely used by market gardeners, this handsome beet has been superseded in most sections by Early Wonder, Crosby's Egyptian, and Detroit. The roots are round, slightly top-shaped, and of a bright red color. A good sort for the home garden, for both early and mid-season sowing. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts. Postpaid.

Special Crosby's Egyptian Beet.

BROCCOLI

Tait's Thorobred Norfolk A delicious vegetable that should be more universally grown. It combines the mellow flavor of the Cauliflower with the nutty tange of Celery, and is considered by many superior to Cauliflower, as it has a more delicate flavor. It differs from the Valentine Broccoli in that it is much smaller, and the head is green instead of white. The plant grows about 2 feet high, producing a medium sized central head. After the central head has been cut, numerous sturdy shoots develop, each sprout terminating in a small green head. There are numerous stocks of Broccoli, many of which are not worth planting. Our stock has been bred to produce the largest central head, and is preferred by critical market gardeners, as it commands the highest prices on all markets. Pkt. 10 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00. Postpaid.

Salad, or Turnip This variety has become very popular on the Eastern Shore of Virginia. It is planted in the fall, and in growth, somewhat resembles the Seven Top Turnip. In the spring it sends up sprouts, which are cut and bunched for market. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts. Postpaid.

St. Valentine This variety is popular in the West. The large solid heads resemble cauliflower and remain in good condition longer than any other sort. Pkt. 10 cts., oz. 75 cts., $\frac{1}{4}$ lb. \$2.00, lb. \$7.00. Postpaid.

CARROT

Chantenay Considered the handsomest of all carrots. This fine half long variety is seven inches in length by one and a half inches in diameter, and is a favorite with truckers, market and home gardeners. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts. Postpaid.

Chantenay Red Cored This handsome carrot is practically the same shape and size of Chantenay, and differs from it only in that it shows red all the way through without any yellow core. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts. Postpaid.

Danvers A standard half long variety growing seven or eight inches long by two inches in diameter, and although it will yield more tonnage per acre, is not as popular with Southern truckers as Chantenay. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts. Postpaid.

COLLARDS

Tait's Thorobred Cabbage Head A new variety differing from the ordinary so-called "Cabbage Collard" in that it resembles a cabbage more than a collard. A large percentage of them have soft heads, formed by the folding of the center leaves. It is hardy, short stemmed, and of excellent quality. Pkt. 10 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.25. Postpaid.

Southern Short Stem A great favorite in the South, where it will live, flourish, and yield a bountiful return in places where it would be almost impossible to raise cabbage heads. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts. Postpaid.

White Cabbage This popular Collard forms a sort of head, and is more attractive in appearance than the Southern Short Stem, although the latter is better to carry through the winter. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts. Postpaid.

CABBAGE

Buy the Best if you have to plant less.
It pays to pay for quality

Tait's Thorobred Pilot The earliest cabbage in cultivation, being ready for market quite two weeks in advance of the Selected Wakefield. The long conical shape of the head allows nearly twenty per cent more plants to the acre than of any other cabbage. Does not head as hard as the Wakefields. Pkt. 10 cts., oz. 35 cts., $\frac{1}{4}$ lb. 90 cts., lb. \$3.25. Postpaid.

Tait's Thorobred Selected Wakefield A selection from the True Early Wakefield, that is about a week earlier in maturing. The heads are solid and the same shape as the True Early Wakefield, but smaller, and very uniform in heading. All growers of Early Cabbage should use it in connection with our other strains of Wakefield. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25. Postpaid.

Tait's Thorobred True Wakefield Our Thorobred strain of True Wakefield is undoubtedly one of the finest early cabbages in existence. The heads are good size, conical in shape, solid, and have few outside leaves. Matures about a week later than Selected Wakefield. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25. Postpaid.

Tait's Thorobred Norfolk Wakefield In our ceaseless efforts to improve the Wakefield Cabbage we have succeeded in getting a variety that will average nearly as large as the Charleston Wakefield with handsome solid heads, yet two weeks earlier. We believe it is what truckers and market gardeners have been looking for and we urge all cabbage growers to have a portion of their crop in this variety. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25. Postpaid.

Early Jersey Wakefield This well known cabbage is still largely used by plant growers. It, however, cannot compare with Tait's Thorobred True Early Jersey Wakefield, which has been bred to produce earlier and larger heads. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Large or Charleston Wakefield Very popular in the cabbage-growing district about Charleston, so much so that it is quite often called the Charleston Wakefield. It is a little larger than Norfolk Wakefield and about ten days later in maturing. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Golden Acre A selection from Copenhagen Market that matures about a week earlier than that variety. The heads average about four pounds, are round as a ball, very firm, and are of good quality. Owing to its earliness, uniformity, and attractive appearance, it is a popular variety. Pkt. 10 cts., oz. 35 cts., $\frac{1}{4}$ lb. 95 cts., lb. \$3.50. Postpaid.

Copenhagen Market One of the best round-headed early cabbages, of medium size, very solid, and of good quality. Very popular in the North and West. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 70 cts., lb. \$2.50. Postpaid.

Tait's Thorobred Midsummer About 10 days later than Tait's Early Summer. This distinct strain of Flat Dutch we consider a splendid second early variety. The heads are solid, of unsurpassed beauty, and are very uniform. An excellent cabbage for the season after which it is named. Pkt. 10 cts., oz. 30 cts., $\frac{1}{4}$ lb. 90 cts., lb. \$3.00. Postpaid.

All Head One of the many Long Island selections of Early Flat Dutch, sometimes called Solid South, and characterized by a compact, uniform head. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Tait's Thorobred Norfolk Wakefield Cabbage.

All Seasons A splendid strain of Flat Dutch originated by a Long Island market gardener and familiar in many places under the name of "Vandegaw." Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Succession A well-known sort, very solid and uniform in heading, but we prefer Tait's Early Summer or Tait's Midsummer for second early cabbages. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Louisville Drumhead There is no cabbage of the Drumhead type which can be compared with this beautiful representative, its shape, color, firmness, and excellent table qualities giving it easily the very first place. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Danish Ballhead A distinct round head solid cabbage, with short stem, often called "Hollander." It requires a strong deep soil and cool climate to bring it to perfection. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25. Postpaid.

Tait's Thorobred Winter King We believe this to be the hardest of all cabbages, resisting marvelously the extremes of heat and cold, and drought and moisture. The stem is short, producing large solid heads with dark bluish green leaves that are noticeable for their thickness and firm texture. The "Winter King" may also be successfully used for late summer, but it is especially recommended for the season after which it has been named. Pkt. 10 cts., oz. 30 cts., $\frac{1}{4}$ lb. 90 cts., lb. \$3.00. Postpaid.

Large Late Flat Dutch A splendid variety for fall or winter use, producing immense heads of the finest quality; splendid keeper. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75. Postpaid.

Perfection Drumhead Savoy Truckers will find in this Savoy the finest strain of that type, the heads being globular, very uniform and firm, with every leaf densely savoyed. It is of delicate flavor, almost like cauliflower, and is excellent for winter use. A splendid home garden variety when sown in mid-summer. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.75. Postpaid.

Mammoth Red Rock Probably the finest red cabbage. It is medium early, of fine quality, has few outside leaves, and is of the darkest red color. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 70 cts., lb. \$2.50. Postpaid.

One of our Specialties

KALE

Our stocks are unexcelled

Tait's Thorobred Dwarf Blue Curled

Scotch The leaves of this handsome dwarf Kale (sometimes known as Jamaica or Bloomsdale) are of a dark, bluish-green color, which is very much more attractive than the bright yellowish-green of the Dwarf Green Scotch. The leaves are intricately and most beautifully curled, stand for a longer time in the spring before turning yellow, and it commands a higher price in all markets. Those who sow Scotch Kale largely should use this sort instead of the Green Curled Scotch. Pkt. 10 cts., oz. 15 cts., ¼ lb. 30 cts., lb. \$1.00. Postpaid.

Tait's Thorobred Dwarf Green Curled

Scotch A variety of kale, once popular in the South, but now superseded by Tait's Dwarf Blue Scotch. The leaves are of a bright yellowish-green color and finely curled. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 90c. Postpaid.

Long Seasons A distinct, extremely hardy variety with slightly curled leaves which remain green for a long time. It can usually be cut for market long after other varieties of kale and "greens" have gone to seed. The best time for seeding is July to October. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 90 cts. Postpaid.

Tait's Thorobred Plain A most useful salad of the rape family, sometimes called Norfolk Kale or Spring Sprouts. While young it is very sweet and far more tender than curled kale. It is of rapid growth and under ideal conditions may be cut in three weeks from seeding. Although usually sown in the spring, it may be sown in the early or even late fall as it is not hurt by ordinary cold weather. Oz. 5 cts., ¼ lb. 10 cts., lb. 30 cts. Postpaid.

Tait's Thorobred Favorite Curled

Siberian Our strain of Siberian or "Blue Kale," as it is sometimes called, cannot be beat. It is hardy, very productive, grows rapidly and is very slow running to seed in the spring. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 75 cts. Postpaid.

LETTUCE

Tait's Thorobred White Boston Lettuce

Tait's Thorobred Earliest of All Growers of lettuce, either for pleasure or profit, will find it to their advantage to have a portion of their crop in this variety. As the name implies, it is the earliest heading lettuce in cultivation, and does equally as well under glass or in the open ground. The heads are of medium size, fold tightly, and are a rich creamy tint, the outside leaves being similar in color to those of the Big Boston. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$1.75. Postpaid.

Tait's Thorobred Big Boston A favorite variety along the entire Southern Seacoast. The head is beautifully blanching, and in crisp tenderness is all that could be desired. Pkt. 10 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.15. Postpaid.

Tait's Thorobred White Boston Those who grow Big Boston Lettuce will appreciate this handsome variety. It is a pure line selection from "White Boston" without any red on the leaf edge. It has been carefully bred for uniformity in size and maturity. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$1.75. Postpaid.

Unrivaed A large, light, bright green heading lettuce similar in habit of plant to Big Boston, but a trifle earlier maturing and having no red or bronze shadings on the leaves. New York or Wonderful This variety is also often sold under the name of Los Angeles Market Iceberg, and is becoming more popular in the South and East each season. It is a curled and crisp heading variety, medium large, dark green and slightly curled on the edges, while the extra large head is well blanching and firm. Good for either spring, summer or fall sowing. Slow in running to seed. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$1.75. Postpaid.

New York or Wonderful Lettuce No. 12

Grand Rapids This loose leaved variety has become a favorite everywhere, especially in the West, but must not be used where a head lettuce is wanted. Tait's Thorobred Norfolk Cos Lettuce.

PEAS

Thomas Laxton The pods of our stock of this popular early pea are very dark green and we consider it one of the best extra early peas for market gardeners. In our judgment there can be no question as to its having a strong constitution, and therefore suffers but little in bad weather. Unlike most wrinkled peas, it germinates vigorously, and the vine is robust, hardy, maturing the crop with great uniformity. The pods, although shorter than those of Laxtonian, owing to their bluntness, really contain as many peas, and their dark green color adds materially to the market value; the peas themselves are very large and possess the luscious sweetness of the true sugar peas. Height, three feet. Pkt. 10 cts., ½ lb. 20 cts., lb. 30 cts., 2 lbs. 55 cts., 5 lbs. \$1.25, 10 lbs. \$2.15. Postpaid. Not prepaid, 25 lbs. \$4.00, 50 lbs. \$7.50.

Pilot Earlier and hardier than the Thomas Laxton and with longer pods, this is a splendid early sort and on account of its hardiness it can be planted in the spring three weeks before Thomas Laxton, and the quality is nearly as good. The vines are vigorous and bear throughout the length of the stem a large proportion of the pods in pairs. Height, three feet. Pkt. 10 cts., ½ lb. 20 cts., 1 lb. 30 cts., 2 lbs. 55 cts., 5 lbs. \$1.25, 10 lbs. \$2.15. Postpaid. Not prepaid, 25 lbs. \$3.50, 50 lbs. \$6.50.

Laxton's Progress Very Early—Dwarf—Largest Pods. The earliest and by far the best in quality of the large-podded dwarf sorts. It also is the heaviest yielder in its class. Laxton's Progress is an improvement upon the well known Laxtonian, and is superior as a market sort. The vines grow 15 to 18 inches high and the pods are 4 to 4½ inches long, of a deep green color, well filled with dark green peas of the finest quality. Pkt. 10 cts., ½ lb. 20 cts., lb. 30 cts., 2 lbs. 55 cts., 5 lbs. \$1.25, 10 lbs. \$2.15. Postpaid. Not prepaid, 25 lbs. \$3.50, 50 lbs. \$6.50.

Laxtonian Our stock of this splendid dwarf early pea has very dark green pods. The pods are large and unusually well filled with peas of splendid flavor. The vine grows about fifteen inches high and in appearance resembles closely Blue Bantam and Hundredfold. Pkt. 10 cts., ½ lb. 20 cts., lb. 30 cts., 2 lbs. 55 cts., 5 lbs. \$1.25, 10 lbs. \$2.15. Postpaid. Not prepaid, 25 lbs. \$3.50, 50 lbs. \$6.50.

Prolific Early Market A smooth, white seeded variety still used by a few growers who have found it dependable. Height, 2½ feet. Pkt. 10 cts., ½ lb. 20 cts., lb. 30 cts., 2 lbs. 50 cts., 5 lbs. \$1.10, 10 lbs. \$1.95. Postpaid. Not prepaid, 25 lbs. \$3.25, 50 lbs. \$6.00.

PARSLEY

Tait's Thorobred Curled Scotch For either market or the home garden we strongly recommend this variety. The color is very dark green and the leaves are most beautifully curled. Pkt. 10 cts., oz. 15 cts., ¼ lb. 25 cts., lb. 85 cts. Postpaid.

Plain A strong, hardy plant, which is excellent for seasoning, but not so pretty for garnishing as the curled varieties. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 75 cts. Postpaid.

Hamburg A rooted variety that in growth resembles parsnips, and used for flavoring soups. Pkt. 10 cts., oz. 15 cts., ¼ lb. 45 cts., lb. \$1.50. Postpaid.

Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 65 cts. Postpaid.

SPINACH

Re-Selected Norfolk Bloomsdale Spinach.

TAIT'S THOROBRED RE-SELECTED NORFOLK BLOOMSDALE SAVOY

The standard spinach for Southern market gardeners. The leaves are of the darkest green, and curled to perfection, retaining their peculiar crispness long after being cut and packed. As we are among the largest growers of spinach seed in the United States, we can, and invariably do, offer it at as low a price as is consistent with the quality of our seed. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 35 cts. Postpaid.

Nobel—Giant Leaved An improved strain of Viroflay Spinach. It combines the rapid growing habit of the early varieties with the long standing quality of varieties like King of Denmark and Juliana, and produces the largest plants of any smooth leaf variety yet introduced. The medium green leaves are rounded at the tip, slightly crumpled, but not savoyed, and are especially succulent and tender. On account of its splendid quality and productiveness, it is recommended for home gardens, local market, and canners. Oz. 5 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts. Postpaid.

Tait's Thorobred Long Standing Bloomsdale Savoy This variety, as its name implies, has been bred for its long standing qualities. The color is very dark green, the leaves remarkably savoyed, and it will remain in marketable condition in the spring two weeks longer than the ordinary Bloomsdale before going to seed. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts. Postpaid.

Princess Juliana An improved late seeding spinach and one of the best varieties for spring sowing for local markets, as it is of splendid quality, very productive and slow to shoot to seed. The leaves are slightly savoyed and quite dark in color. For shipping it is not so good as Long Standing Bloomsdale Savoy. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts. Postpaid.

TAIT'S VIRGINIA YELLOWS RESISTANT SAVOY

For many years growers of spinach around Norfolk have lost considerable money each season because of a disease in spinach commonly called "Spinach Blight," which often destroys whole crops. Several years ago the Virginia Truck Experiment Station at Norfolk began experiments to get rid of this disease, and after six years of hard work succeeded, by hybridization, in breeding a spinach that was practically "Blight Resistant," and which we have named Virginia Savoy. This variety should be used in preference to ordinary Bloomsdale Savoy in sections where "blight" is prevalent. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 35 cts. Postpaid.

Virginia Savoy Spinach.

King of Denmark A popular Long Standing variety. It is medium early, of rapid growth, resembling somewhat Long Standing, but the leaves are more savoyed, and of a dark green color. Slow in running to seed. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts. Postpaid.

Old Dominion Spinach.

New Zealand A tall spreading plant with numerous side shoots, and although called "Spinach," is not botanically related to the Spinach Family, but is a good substitute. It grows vigorously during warm weather, producing an astonishing amount of foliage, new leaves promptly taking the place of those that are cut. It will not stand frost, and the seed should be soaked over night before planting. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts. Postpaid.

OLD DOMINION YELLOWS RESISTANT LATE SEEDING SAVOY

A late seeding hybrid Spinach developed at the Virginia Truck Experiment Station at Norfolk by crossing Virginia Savoy with King of Denmark. It possesses the blight-resistance of Virginia Savoy, and the late-seeding characteristic of King of Denmark. The foliage is dark bluish green, and evenly savoyed except at leaf tips. The growth is compact and flatter than that of Virginia Savoy, and it is two weeks later in shooting to seed. It should be sown only in the late fall or early spring for spring crop in areas where spinach "blight" is prevalent. As it makes a slower growth in the fall than does the Virginia Savoy, it is not recommended for the fall crop. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 35 cts. Postpaid.
